DETAILED ACTION

Allowance

1. Claims 1 to 17 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Claim 1: Prior art fails to disclose or make obvious a method for characterizing the structure or sub-structure of a glycan or glycan derivatives comprising the steps of scoring to produce ranked confidence scores for each of the candidate structures by comparing the masses of the experimentally derived fragments with the masses of the theoretically derived fragments and if insufficient confidence is obtained in the highest ranked score, further including the step of repeating the process by taking into account more complex cleavage patterns in the theoretical fragmentation step, or by obtaining further fragments.

Claim 10: Prior art fails to disclose or make obvious a method for characterizing the structure or sub-structure of a glycan or glycan derivatives comprising the steps of matching the mass of the fragments of the unidentified glycan molecule with the mass of fragments theoretically derived from the candidate structures and utilising a segmentation scoring method to produce ranked confidence scores for at least one of the candidate structures by counting, the number of possible conformations for a glycan identified by a set of matching oligosaccharide fragments and assessing the quality of match for the candidate structure by determining how well a particular conformation is supported by the evidenced fragments.

Relevant Prior Art

3. Ethier et al. (supplied by the Applicant in the IDS of 12/08/2005) fails to disclose the steps of scoring to produce ranked confidence scores for each of the candidate structures by comparing the masses of the experimentally derived fragments with the masses of the theoretically derived fragments and if insufficient confidence is obtained in the highest ranked score, further including the step of repeating the process by taking into account more complex cleavage patterns in the theoretical fragmentation step, or by obtaining further fragments.

4. Joshi et al. (supplied by the Applicant in the IDS of 12/08/2005) discloses the methods in the instant application however this reference has been published after the filing date of the instant application.

5. Other prior art include: Marshall (US 7,297,940), Yates et al. (US 5,538,897 and US 6,017,693), and Townsend et al. (US 6,582,965 and US 6,963,807).

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
